Environmental Consultancy

At Woodrow we have a long and very successful history of providing environmental training and education. We see it as the key to positive environmental change.

We have the skills and expertise to devise training courses, events and programmes, to deliver training in our own specialist subjects and to oversee the delivery of large scale training programmes on environmental themes.

- Biodiversity Training Courses
- Community Information Evenings & Workshops
- Local Authority Biodiversity Programmes
- Green Skills Training

Ecological Surveys

Moving towards a greener future often requires changes in the way we work or the way we work together.

Facilitation is a tool that can be used to reach a consensus on how best to make such changes, resolve conflict and, ultimately, find an agreed way forward. While facilitators do not need to be experts in a given field, knowledge of environmental issues can be a great asset.

Impact Assessments

Project animation is a phrase that is increasingly encountered with respect to working with communities.

Essentially it means making things happen and, often requires a considerable amount of input to let people know about a project, to encourage their participation in the project, and to support them in getting the most out of a project.

Tidy Town Audits and Strategic Plans

We are delighted that the Tidy Town movement is increasingly leaning towards understanding and helping our natural environment as a central part of the programme.

We have undertaken wildlife audits for a number of communities and have produced wildlife action plans that fit well into a Group's 3-year plan. We have a TidyTowns adjudicator on our staff as well as wildlife professionals with many years' experience in practical projects and environmental awareness.

About

Woodrow Sustainable Solutions was started in 2004 by Will Woodrow, an enthusiastic and highly experienced environmental consultant and sustainability expert with more than 25 years' experience. Will set up Woodrow Sustainable Solutions to offer services across a range of environmental subjects. These include ecology, energy, sustainable construction, environmental education, training, policy / legislation advice.

Company Belief

The company belief is that that the best way to practice sustainability is through an integrated approach. "An understanding of all the issues is crucial in offering an appropriate, targeted level of advice and service," Will explains.

Will and his colleagues are highly knowledgeable and skilled in their fields. So you can be sure that you'll have access to tailor-made service of the highest quality.

Established

Trading since 2004, Woodrow Sustainable Solutions is a company with the ability to adapt and change as requirements develop. With the depth of knowledge collated, we can offer high quality services within a budget to suit today's climate.

Integrated Approach

Environmental sustainability is about addressing wide-ranging and complex issues. An effective, integrated approach is what is needed, what you should expect, and what WSS can deliver.

Here at Woodrow Sustainable Solutions, we can offer appropriate, tailored, services to enable companies, agencies and individuals to take practical steps towards sustainability.

Highest Quality

Membership of the Institute of Ecological & Environmental Management (IEEM) means that Woodrow Sustainable Solutions adheres to codes of practice and guidelines to ensure a high quality of credible work in this area
